NETWORK/TCP/IP

OPPS

C/C++

## PERSONAL PROJECTS

### E-commerce Web Application

- Developed a full-featured e-commerce web application using React, JavaScript, and a RESTful API backend. This application enables users to browse products, view detailed descriptions, add items to the cart, and complete secure online transactions. The admin panel allows for easy management of inventory, orders, and customer data.  
**Technologies Used** : Frontend: React, JavaScript, HTML5, CSS3, Material-UI

### Wether App

- This is a Weather App created using React and JavaScript. The app takes the name of a city as input and, with the help of an online weather API, returns the current weather status of that city.  
**Technologies Used** : React, JavaScript, HTML5, CSS, Axios
- **Uses in Assist in Agriculture** :
- **Travel Preparation** :
- **Monitor Weather for Multiple Locations for new website**

### Tourism Website Clone (M.P.)

- Created a clone of the Madhya Pradesh (M.P.) This project provides detailed information about various tourist attractions across different divisions of the state. The website features visually appealing layouts, with images and video links showcasing the beauty of famous destinations in M.P.

## ACHIEVEMENT

### Earn Coding Ninjas Specialist Badge

*Earned after successfully solving multiple coding challenges and demonstrating proficiency in programming concepts and problem-solving skills.*
